

# Assignment 1

1. Create a blank file named 'myfile' and open it in vi editor.

```
File Edit View Search Terminal Help
[root@osboxes osboxes]# touch myfile
[root@osboxes osboxes]# vi myfile
```

2. Edit all the required details and exit by pressing **esc** and then **':wq!'**.

[illegible]

3. Then enter the command to view both name and blood at the same time from myfile.

```
File Edit View Search Terminal Help
[root@osboxes osboxes]# touch myfile
[root@osboxes osboxes]# vi myfile
[root@osboxes osboxes]# grep 'Name\|Blood\Group' myfile
Name : Ramansh Sharma
[root@osboxes osboxes]# grep 'Name\|Blood\ Group' myfile
Name : Ramansh Sharma
Blood Group : B+
[root@osboxes osboxes]#
```
